MS1: Maximum Zigzag

[Bottom=Parking #14 | Left=Single #9 | Top=#20 | Right=#15]

CLOCKWISE | Wall: 2/5 | Parking p1 corner-exit

COUNTER-CLOCKWISE | Wall: 4/5 | 2x ZIGZAG (Top, Right) + parking p3

CW Watch:

> Parking: Red/Inner@p1 wall-side after corner
> Left: Green/Outer@p2 single wall-side
> Baseline - should pass reliably

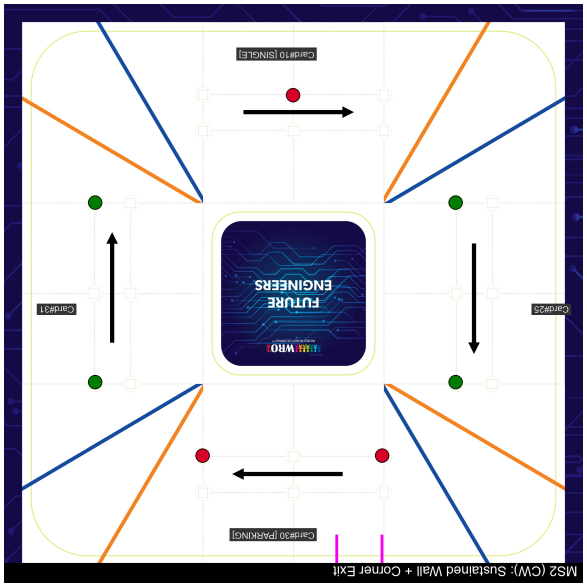

CCW Watch:

> Top: ZIGZAG Green/Inner@p3 then Red/Outer@p1 (cross lane!)
> Right: ZIGZAG Red/Outer@p3 then Green/Inner@p1
> Parking: Green/Inner@p3 corner-exit wall-side
> Watch servo lag during lane-crossing

MS2: Sustained Wall + Corner Exit

[Top=Parking #30 | Bottom=Single #10 | Right=#31 | Left=#25]

CLOCKWISE | Wall: 4/5 | SUSTAINED (Top-inner + Right-outer)

COUNTER-CLOCKWISE | Wall: 3/5 | Sustained inner (Left) + p2 wall

CW Watch:

> Top(park): BOTH Red/Inner - sustained inner full straight
> Right: BOTH Green/Outer - sustained outer full straight
> Corner-exit p1 in parking = immediate wall-side
> Watch drift toward wall over distance

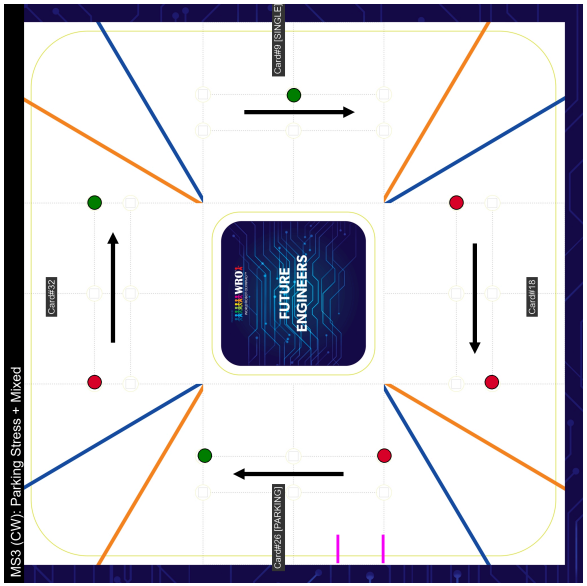

CCW Watch:

> Left: BOTH Green/Inner - sustained inner
> Bottom: Red/Outer@p2 mid-section wall-side
> Parking is EASY in CCW (both open-side)
> Watch sustained inner precision

MS3: Parking Stress + Mixed

[Left=Parking #26 | Right=Single #9 | Top=#32 | Bottom=#18]

CLOCKWISE | Wall: 4/5 | Spread across ALL sections

COUNTER-CLOCKWISE | Wall: 3/5 | Parking p3 corner-exit + spread

CW Watch:

> Every section has 1 wall-side - tests CONSISTENCY
> Parking: Red/Inner@p1 corner-exit
> Bottom: Red/Inner@p1 corner-exit (same pattern)
> Watch random single-section failures

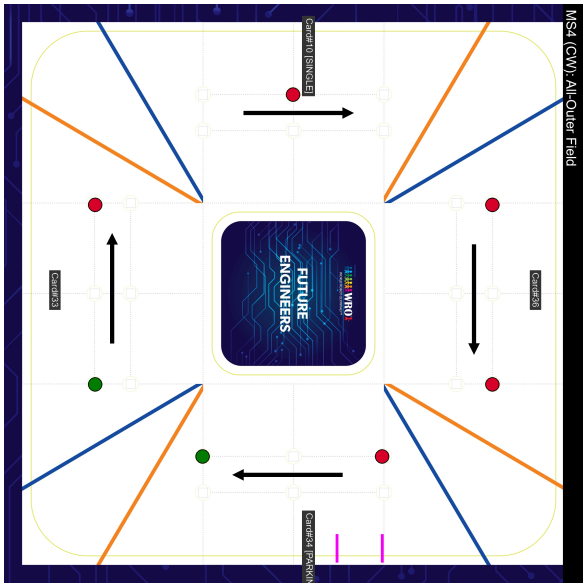

CCW Watch:

> Parking: Green/Inner@p3 corner-exit (first in CCW)
> Bottom: Red/Outer@p3 corner-exit
> Top: Red/Outer@p1 pre-corner wall-side
> Watch CCW corner-exit consistency at p3

MS4: All-Outer Field

[Right=Parking #34 | Left=Single #10 | Top=#36 | Bottom=#33]

CLOCKWISE | Wall: 2/5 | Light baseline + parking check

COUNTER-CLOCKWISE | Wall: 5/5 | MAXIMUM - all outer wall

CW Watch:

> Light run - baseline with parking Red/Inner@p1
> Bottom: Green/Outer@p1 corner-exit wall-side
> Confidence check before CCW stress

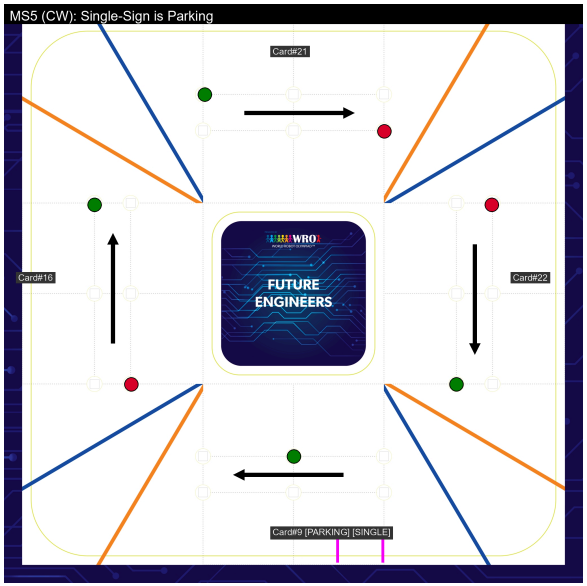

CCW Watch:

> HARDEST RUN: 5/5 pillars wall-side!
> Top: SUSTAINED Red/Outer full straight
> Left: Red/Outer@p2 mid-section wall-side
> Bottom+Parking: corner-exit at p3
> Watch outer vs inner asymmetry

MS5: Single-Sign is Parking

[Bottom=Parking+Single #9 | Top=#21 | Right=#22 | Left=#16]

CLOCKWISE | Wall: 4/5 | 2x ZIGZAG (Top + Left) CW stress

COUNTER-CLOCKWISE | Wall: 3/5 | Parking p2 wall + zigzag (Right)

CW Watch:

> Top: ZIGZAG Red/Inner@p3 then Green/Outer@p1
> Left: ZIGZAG Green/Outer@p3 then Red/Inner@p1
> Parking: only 1 pillar, open-side (easy)
> Compare CW zigzag to MS1-CCW zigzag

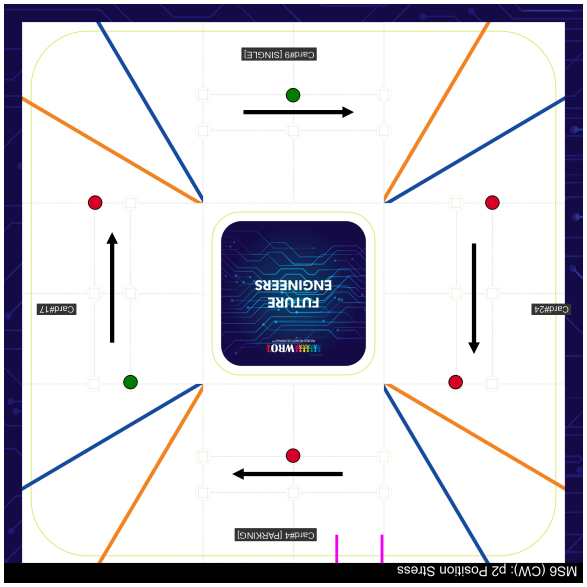

CCW Watch:

> Parking: Green/Inner@p2 WALL mid-section, no corner cue!
> Right: ZIGZAG Green/Inner@p3 then Red/Outer@p1
> Watch p2 detection without corner trigger
> Watch parking approach with mid-section wall pillar

MS6: p2 Position Stress

[Top=Parking #4 | Bottom=Single #9 | Right=#17 | Left=#24]

CLOCKWISE | Wall: 3/5 | p2 wall IN PARKING every lap!

COUNTER-CLOCKWISE | Wall: 3/5 | Zigzag (Right) + corner-exit p3

CW Watch:

> Parking: Red/Inner@p2 WALL mid-section every lap!
> Bottom: Green/Outer@p2 wall mid-section
> Left: Red/Inner@p3 pre-corner wall-side
> Watch if p2 hit more than p1/p3

CCW Watch:

> Right: ZIGZAG Red/Outer@p3 then Green/Inner@p1
> Left: Red/Outer@p1 pre-corner wall-side
> Parking is EASY in CCW
> Watch zigzag + corner-exit combo
